

Complete this lab as follows:

1. Add the 1000Base TX adapter to the Office 2 computer.
 1. Above the computer, select **Motherboard** to switch to the motherboard view of the computer.
 2. Under Shelf, expand **Network Adapters**.
Identify the network adapter that has the fastest Ethernet speed.
 3. Under Shelf, drag the **Network adapter, Ethernet 1000BaseTX, PCIe** network adapter to a free PCIe slot on the computer.
2. Connect the computer to the network.
 1. Above the computer, select **Back** to switch to the back view of the computer.
 2. Drag the **RJ45 Shielded Connector** from the motherboard's NIC to the port of the 1000BaseTX network adapter.
3. Verify the connection to the local network and the internet.
 1. Above the computer, select **Front** to switch to the front view of the computer.
 2. Select the **power button** on the computer case.
Wait for the operating system to start.
 3. Right-click **Start** and then select **Settings**.
 4. Select **Network & Internet**.
The diagram should indicate an active connection.
