6.21 Lab: Create CNAME Records

Candidate: COMPTIA COMPTIA ()
Time Spent: 00:18

Score: 0%

Task Summary

Required Actions

✕ Create the ALIAS (CNAME) record with a blank name pointing to CorpWeb.CorpNet.local   Show Details

✕ Create the intranet ALIAS (CNAME) record pointed to CorpWeb.CorpNet.local   Show Details

✕ Create the www ALIAS (CNAME) record pointed to CorpWeb.CorpNet.local   Show Details

Explanation 🎧

Complete this lab as follows:

1. Access the CorpDC virtual server.
    a. From Hyper-V Manager, select **CORPSERVER**.
    b. Double-click **CorpDC** to connect to the server.
    c. Maximize the window for better viewing.

2. For the sales.private zone, create the ALIAS (CNAME) record with a *blank name* pointing to CorpWeb.CorpNet.local.
    a. From Server Manager, select **Tools** > **DNS**.
    b. Maximize the window for better viewing.
    c. Expand **CORPDC** > **Forward Lookup Zones**.
    d. Right-click the **sales.private** zone and select **New Alias (CNAME)**.
    e. Configure the new record as follows:

    ▪ Alias name: *Leave blank*
    ▪ Fully qualified domain name (FQDN) for target host: **CorpWeb.CorpNet.local**

    f. Select **OK**.

3. For the sales.private zone, create the *intranet* ALIAS (CNAME) record pointed to CorpWeb.CorpNet.local.
    a. Right-click the **sales.private** zone and select **New Alias (CNAME)**.
    b. Configure the new record as follows:

    ▪ Alias name: **intranet**
    ▪ Fully qualified domain name (FQDN) for target host: **CorpWeb.CorpNet.local**

    c. Select **OK**.

4. For the sales.private zone, create the *www* ALIAS (CNAME) record pointed to CorpWeb.CorpNet.local.

a. Right-click the **sales.private** zone and select **New Alias (CNAME)**.
b. Configure the new record as follows:

- Alias name: **www**
- Fully qualified domain name (FQDN) for target host: **CorpWeb.CorpNet.local**

c. Select **OK**.
