2.7 LAB

While completing this lab, use the following port information.

Patch Panel Port	Cisco Switch Port
Exec 1	Port 1
Supp	Port 6
Lobby	Port 8

Complete this lab as follows:

1. From the Networking Closet, attach an Ethernet cable from the patch panel to the switch port.
    1. Under Shelf, expand **Cables**.
    2. Select the **Cat6a Cable, RJ45**.
    3. From the Selected Component pane:
        ■ Drag an **RJ45 Shielded Connector** to the **Exec 1** port on the patch panel.
        ■ Drag the other **RJ45 Shielded Connector** to the correct *port* on the Cisco switch (top row).
    4.
2. Repeat steps 1b-1c for the **Supp** and **Lobby** ports.
