4.1 LAB

Complete this lab as follows:

1. Begin a Wireshark capture.
    1. From the Favorites bar, select **Wireshark**.
    2. Maximize the window for easier viewing.
    3. Under Capture, select **enp2s0**.
    4. Select the ***blue fin*** to begin a Wireshark capture.
    5. Wait about 5 seconds, then select the ***red square*** to stop the Wireshark capture.
2. Apply a filter for HTTP POST traffic.
    1. In the *Apply a display filter* field, type **http.request.method==POST** and press **Enter** to show the HTTP POST requests.
3. Select a packet and answer the questions.

    1. In the packet list pane, select one of the packets
    2. Select **Questions**
    3. In the packet details pane, expand the packet sections to view the packet details.
    4. Answer Questions 1 and 9.
